

Custom Timber Trusses

We design and fabricate structural exposed timber trusses to provide a custom feel to your project. These trusses can be made from cypress, western red cedar, or any other specialty lumber.

Product Guide

It's Not Just Trusses.

Roof and Floor Truss Systems

Engineered wood trusses are your assurance of a structurally sound building. Our trusses are engineered to withstand over twice the required load, while saving time and money on the job site.

Beams & Hardware

In addition to our custom manufactured products, we also offer engineered wood beams and metal connector hardware necessary for truss installation.

QualityTrim Floor Trusses

We offer trimmable-end floor trusses in 1' increments from lengths of 14' to 24' with additional lengths available upon request. QualityTrim trusses come in depths of 16" and 18".
